

## February 2012 DEALER Specials

**Kelba's** KH-MH-500 wheel chair scale offers the user easy and safe access via built-in entry and exit ramps, reducing patient disturbance. Portable design includes wheels and handles located on its side to make moving the scale from place to place an easy task. Ideally suited in a vast range of medical applications for either use with wheel chairs or as a stand on scale. Its 500kg capacity can cover a wide range of weighing applications. The scale includes either a pole or desk / wall mountable indicator with an 18mm bright RED LED display, with low power and over load indication.

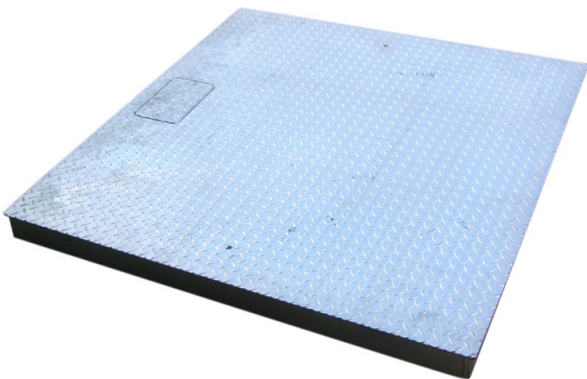

### Capacities

**500kg x 0.2kg**

### KH-MH Wheelchair Scale

### Kelba KLP-G-3000-1200 NMI Platform Scale base.

**Kelba's** KLP-G-3000-1200 x 1200mm NMI (Trade Approved) platform scale provides low cost fast accurate weighing of bulk goods. Built in Australia the KLP-G-3000-1200 is built using a simple multiple cross bracing system using 8 x 10mm x 60mm flat bar construction, eliminates any deflection. This also allows for odd size custom scales to make simply and at a cost effective price. It's clean under plate design eliminates product entrapment. Easy electronic corner adjustment can be done via accessing the stainless steel junction box via access hatch in the top deck. Supplied with 4 x Kelba KL1000ZC3 loadcells, 1 x Stainless Junction Box, 4 x tool steel ball & cup feet & 5 mtr's of stainless steel braided cable from junction box for connection to indicator of choice.

As for a great combo price when fitted with any Rinstrum indicator.

**Plus receive 1 x FREE KOCS-L Hanging scale for free! With every platform base purchase.**

**Kelba's KCB-E-20** electronic baby scale is a designed with advanced technology for precision weighing of new born and growing babies. It is portable and light weight at only 3.2kg net weight and can be used in Homes, Hospitals, Doctors surgery's and Baby health clinics etc. It's low profile and large foot print ensures safety and stability. The Kelba baby scale is equipped with movement compensation technology, essential to eliminate involuntary movement caused by the baby.
