

Scaime Discover our products and solutions....

A recognized technological heritage

Recognized for our technological expertise heritage and the high quality of our products, we have become one of the world leaders in the field of load cells and industrial measurement. We are a preferred partner for many industries such as weighing, chemicals, food processing, metallurgy, aeronautics, medical, packaging, etc.

A global player at your service

We are present in more than 40 countries through a network of subsidiaries, partners and specialized distributors. Due to this proximity, we provide a service and logistics to efficiently support our product range.

Our head office, located in ANNEMASSE (France), has a floor area of 4 300 m² and houses our Sales & marketing services, the R&D department and assembly lines dedicated to strain gauges and load cells manufacturing. Our modern equipments include clean room, climatic chambers, laser welding robots and tied calibration means.

With this integrated, flexible and modern set of production solutions, we are able to guarantee the best quality-price ratio for unit deliveries or for large series.

A philosophy: Innovation and quality

All our activities are ISO 9001:2000 certified and we guarantee that our products are conforming with international standards and codes. This commitment to the continued improvement of our processes is intended to create a sustainable long-term relation with our customers. Our growth strategy also involves very high investments in research and development, so that we can offer innovative solutions.
