

## KSB-B4 Platform Scale Summing Junction Box

### Optimizes weighing platform performance with the Kelba KSB-B4 load cell platform summing junction box.

Reduce the time required for weighing platform assembly and optimize overall performance, calibration and stability with the KSB-B4 load cell platform summing junction box. Comes supplied with 5 x IP68 glands which allows you customize the position of the glands.

### Features

<i>* Ensures reliable trimming of multiple load cells up to 4 in total for precise corner matching.</i>	<i>* Improved long-term output stability by the use of a special resistor / trimpot arrangement.</i>
<i>* Simple to use with all wiring details printed on the top side of the circuit board.</i>	<i>* Output connections suitable for 4 &amp; 6 wire cables.</i>
<i>* All wires are screw terminated, making future service work easier.</i>	<i>* Small size enclosure measures only 115mm L x 90mm W x 55mm H</i>
<i>* The tough, weatherproof enclosure is IP67 rated and is excellent for use in wash down areas or wet environments.</i>	<i>* Mounting screws locations are outside of the sealed area of the enclosure making this ideal for wet area applications.</i>
