Five New baby scales for Pennant Hills Medical Centre

Pennant Hills Medical Centre now has five new sets of 'wriggle proof' baby scales for each of the doctor's rooms kindly donated by Kelba (Australia) Pty Ltd who are located at 7 Leonard Street, Hornsby NSW 2077.

All five scales come with a built in tape measure, with ability to weigh in both KG and Pounds. The Kelba baby scales are very light and come with carry bag to allow the doctors to easily transport the scales on home visit if required.

Wayne Grech, General Manager, Kelba (Australia) Hornsby initiated the donation.

At Kelba we like to put back into the community via donations such as this especially when it involves kids and immediately thought of the Pennant Hills Medical Centre.

Dr Keith Betts pictured on the left receiving one of the new baby scales from Wayne Grech of Kelba.

The scales are designed to provide precision weighing of newborn and growing babies and are equipped with movement compensation technology to eliminate involuntary movement caused by baby.
