

Kelba KCS-300 *Chair Scale*

Kelba's Model KCS-300 is a stable well constructed Chair Scale which provides the operator and patient ease of use, especially small children, elderly, frail and handicapped patients. The arm rests move up on both sides of the chair for easy patient transfer to and from the chair scale and firmly fold down when the patient is seated, this reduces lifting strain on both the patient and staff. The additional hinged footrest can be folded up or down also providing for patient comfort during the weighing process. The four large castor wheels, each with their own brake, and wide push handle bar arrangement make it easy to move the scale from one location to other. These features coupled with the large 300kg capacity and extra wide 530mm seat make the KELBA Chair Scale the obvious choice for all your patient weighing needs.

Kelba KCS-300 Chair Scale

Key Features

- ✚ **300kg x 100 grams max capacity**
- ✚ **Extra wide comfortable ABS seat**
- ✚ **Wheels & handles for portability of scale**
- ✚ **Four wheel brakes for safety**
